Brain Pocket Writing:

Brain pocket writing allows each student to choose what they want to write about. It is an educational philosophy, based on what inspires students to write. Brain pocket writing encourages students to either recall memories, recall facts or use their imagination. Today, I'd like a family member or adult in the house to set a 10-minute timer and then I just want your child to write for 10-15 minutes uninterrupted. They can write about anything! They can write about a time in the past, something factual that they know about or a story they create. I look forward to reading their writing! At the end of the newsletter I have attached a piece of paper if you have a printer at home.
